

## PERFORMANCE SCHEDULE – INTERNATIONAL VALUE

	% Total Return Gross of Fees	% Total Return Net of Fees	% Total Return RDEVxUS	# of Accts	Internal Dispersion (%)	Comp. Assets (\$mm)	Total Firm Assets (\$mm)
2016	12.4	11.5	3.4	<6	n/m	2	29,952

n/m – not considered meaningful for composites with five accounts or less for the full year.

Hotchkis and Wiley Capital Management, LLC (the “Firm” or “H&W”) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. H&W has been independently verified for the periods October 9, 2001 through December 31, 2015. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm’s policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The verification report is available upon request.

H&W is an independent investment management firm registered with the U.S. Securities and Exchange Commission and manages value equity and high yield assets for institutional and mutual fund investors. Its predecessor firm was established in 1980. The equity team of the predecessor firm established H&W in October 2001.

H&W refers to itself as a “registered investment adviser” in materials distributed to current and prospective clients. As a registered investment adviser with the SEC, H&W is subject to the rules and regulations adopted by the SEC under the Investment Advisers Act of 1940, as amended (the “Advisers Act”). Registration as an investment adviser is not an indication that H&W or its directors, officers, employees or representatives have attained a particular level of skill or ability.

Valuations and returns are stated in U.S. dollars. Investment returns include reinvestment of dividends, interest, capital gains, and are gross of withholding taxes. Gross performance results are presented before management and custodial fees but after all trading expenses. Net performance results are presented after actual management fees and all trading expenses but before custodial fees. H&W’s management fees are described in Part 2A of its Form ADV. The standard International Value management fee schedule is 80 basis points on the first \$15 million, 70 basis points on the next \$35 million and 60 basis points thereafter. Internal dispersion is calculated using the equal-weighted standard deviation of all portfolios that were included in the Composite for the entire year. A list of composite descriptions and policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Past performance is no guarantee of future performance.

**Composite:** The Composite includes all International Value discretionary accounts. The International Value investment strategy seeks capital appreciation by investing primarily in non-U.S. companies, which may include companies located or operating in established or emerging markets. The strategy will be based on bottom-up investment research and valuation, but will have an awareness of geographic, industry and currency exposures. (Composite creation: 2016)

**Index:** The Russell Developed ex-US Index (“RDEVxUS”) measures the performance of the largest investable securities in developed countries globally, excluding companies assigned to the United States, across all market capitalization ranges. The RDEVxUS is constructed to provide a comprehensive and unbiased barometer for this market segment and is reconstituted annually to accurately reflect the changes in the market over time. The index assumes reinvestment of dividends and capital gains, and assumes no management, custody, transaction or other expenses. The strategy used in managing the accounts in the Composite may prevent or limit investment in major stocks in the RDEVxUS. Additionally, the Composite strategy allows for investments in emerging markets stocks, which are not included in the RDEVxUS. These differences may lead to returns that are not correlated to the returns of the index. Benchmark returns are not covered by the report of independent verifiers.

The 3-year annualized standard deviation measures the variability of the composite (using gross returns) and the benchmark return over the preceding 36-month period. As of December 31, 2016, the Composite did not have a 3-year track record.
