

Strategy Description

The Global Value strategy exploits market mispricings by applying a consistent investment process centered on a balanced assessment of return and risk. We seek to invest in stocks across the market cap spectrum. We emphasize companies with sustainable cash flows, strong balance sheets, and valuations that are attractive relative to tangible assets and long-term normal earnings power.

Strategy Information

- Asset Class: Global Equity
- Benchmark: Russell Developed Index
- Strategy Assets: \$151 million
- Inception Date: 2011
- Number of Stocks: 40 – 80
- Capitalization Range: >\$1 billion
- Emerging Markets Exposure: <20%
- Currency Hedging: Generally unhedged
- Open to new investors
- Separate Account Minimum: \$15 million

Italy	4.0

Asset Allocation¹

Composite Performance as of March 31, 2017

Commencement of Global Value (GV) Composite: 7/1/11. Periods over one year are average annual total returns.

Hotchkis and Wiley Capital Management, LLC (the "Firm" or "H&W") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. H&W has been independently verified for the periods October 9, 2001 through December 31, 2015. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The Global Value Composite has been examined for the periods July 1, 2011 through December 31, 2015. The verification and performance examination reports are available upon request.

H&W is an independent investment management firm registered with the U.S. Securities and Exchange Commission and manages value equity and high yield assets for institutional and mutual fund investors. Its predecessor firm was established in 1980. The equity team of the predecessor firm established H&W in October 2001.

H&W refers to itself as a "registered investment adviser" in materials distributed to current and prospective clients. As a registered investment adviser with the SEC, H&W is subject to the rules and regulations adopted by the SEC under the Investment Advisers Act of 1940, as amended (the "Advisers Act"). Registration as an investment adviser is not an indication that H&W or its directors, officers, employees or representatives have attained a particular level of skill or ability.

Valuations and returns are stated in U.S. dollars. Investment returns include reinvestment of dividends, interest, capital gains, and are gross of withholding taxes. Gross performance results are presented before management and custodial fees but after all trading expenses. Net performance results are presented after actual management fees and all trading expenses but before custodial fees. H&W's management fees are described in Part 2A of its Form ADV. The standard Global Value management fee schedule is 80 basis points on the first \$15 million, 70 basis points on the next \$35 million and 60 basis points thereafter. Internal dispersion is calculated using the equal-weighted standard deviation of all portfolios that were included in the Composite for the entire year. A list of composite descriptions and policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Past performance is no guarantee of future performance.

	% Total Return Gross of Fees	% Total Return Net of Fees	% Total Return RDEV	# of Accts	Internal Dispersion (%)	Comp. Assets (\$mm)	Total Firm Assets (\$mm)
2016	17.8	17.3	8.8	<6	n/m	152	29,952
2015	-5.6	-6.1	-0.2	<6	n/m	181	28,367
2014	3.8	3.3	5.3	<6	n/m	180	32,190
2013	37.5	36.9	28.4	<6	n/m	171	25,962
2012	26.7	26.3	16.9	<6	n/m	55	18,781
2011 ⁽¹⁾	-12.5	-12.7	-10.7	<6	n/a	0.9	16,171

⁽¹⁾ Period from July 1, 2011 (composite inception) through December 31, 2011.

n/a – not applicable for periods less than one year.

n/m – not considered meaningful for composites with five accounts or less for the full year.

Composite: The Composite includes all Global Value discretionary accounts. The Global Value investment strategy seeks capital appreciation by investing primarily in U.S. and non-U.S. companies, which may include companies located or operating in established or emerging markets. The strategy will be based on bottom-up investment research and valuation, but will have an awareness of geographic, industry and currency exposures. (Composite creation: 2011)

Indexes: The Russell Developed Index ("RDEV") measures the performance of the investable securities in developed countries globally across all market capitalization ranges. The RDEV is constructed to provide a comprehensive and unbiased barometer for this market segment and is reconstituted annually to accurately reflect the changes in the market over time. The index assumes reinvestment of dividends and capital gains, and assumes no management, custody, transaction or other expenses. The strategy used in managing the accounts in the Composite may prevent or limit investment in major stocks in the RDEV. Additionally, the Composite strategy allows for investments in emerging markets stocks, which are not included in the RDEV. These differences may lead to returns that are not correlated to the returns of the index. Benchmark returns are not covered by the report of independent verifiers.

The MSCI World Index (Gross) ("MSCIW") measures the performance of more than 20 developed-country stock markets. Effective April 30, 2015, the MSCIW was deleted as a secondary index from the presentation due to the high correlation and redundancy with the RDEV.

The 3-year annualized standard deviation measures the variability of the composite (using gross returns) and the benchmark(s) returns over the preceding 36-month period. As of December 31, 2013, the Composite did not have a 3-year track record.

	3-Year Annualized Standard Deviation (%)	
	Composite	RDEV
2016	13.5	10.9
2015	11.3	10.7
2014	11.7	10.3
