

Manager Review and Economic Outlook**Market Commentary**

The Russell 2000 Index increased +2.47% in the first quarter of 2017, continuing a nearly unbroken string of quarterly gains since mid-2012. The rise in equities has triggered debate about the US equity market's current valuation. Most traditional valuation measures are above historical averages; however, these metrics are below historical averages after adjusting for the low interest rate environment. Our general view is that the broad small cap market is fully valued. Often overlooked, however, is that some market segments contain bargains while others are richly valued. Finding such opportunities has become more difficult in recent years but we continue to observe a large valuation discrepancy between cyclical market segments and those viewed as bond surrogates. Today's popular small cap stocks are those that have relatively stable earnings and high dividend payouts, like consumer staples and regulated utilities. While the underlying businesses are stable, these are mature, slow-growing market segments, and paying 20-25x earnings is a risky proposition in our view. Investing in passive ETFs that track common equity indices is the other preferred strategy of the day, pouring still more investor capital into overvalued stocks and exacerbating the situation. Meanwhile, some market segments that have been shunned trade

for half the valuation levels of the more favored areas of the market, and in select circumstances, even trade at a discount to the replacement cost of the business.

As an example, we own several banks and insurers that trade at discounts to tangible book value; it would cost more to replicate the asset base than to simply buy the company. These businesses continue to have a stigma from the financial crisis, which is in part why current valuations remain attractive, in our opinion. The fact remains, however, that these companies provide essential services to the economy (low obsolescence risk) and have capital ratios/liquidity metrics at the highest levels since the 1930s. Regulatory uncertainty always represents a risk, but this also acts as a barrier to entry as leading franchises are difficult and costly to displace—an often overlooked benefit. We believe the industrials sector also offers attractive valuation opportunities for the risks at hand. We own a mix of attractively-valued companies that trade at bargain prices because the underlying businesses are cyclical.

Because we have identified attractive pockets of opportunity within a fully valued market, the portfolio trades at a large discount to the market. The portfolio trades at 1.3x book value and 8.6x normal earnings compared to 1.6x and 16.3x, respectively, for the Russell 2000 Value.

Compared to the Russell 2000, the portfolio's valuation discount is even more pronounced, as the broad index trades 2.2x book value and 18.7x normal earnings.

Attribution: 1Q 2017

The Hotchkis & Wiley Small Cap Value Fund (Class I) outperformed the Russell 2000 Value Index in the first quarter of 2017. Positive stock selection in Real Estate, Consumer Discretionary, and Industrials were the primary performance contributors during the quarter. This was partly offset by stock selection in Materials and Financials. The largest individual contributors to relative performance were GEO Group, MDC Partners, Meritor, Masonite, and NRG, while the largest detractors were Real Industry, ARRIS, Sonic Automotive, Whiting Petroleum, and KBR.

Portfolio Activity: 1Q 2017

We added six new positions and fully exited five during the quarter, closing with 64 holdings. We increased the weight in Industrials and Real Estate, primarily by adding a new position in WestJet Airline and increasing the position in Seritage Growth Properties. We decreased the weight in Financials and Technology.

Mutual fund investing involves risk. Principal loss is possible. Investing in smaller and/or newer companies involves greater risks than those associated with investing in larger companies, such as business risk, significant stock price fluctuations and illiquidity. The Fund may invest in ETFs, which are subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of an ETF's shares may trade at a discount to its net asset value ("NAV"), an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a Fund's ability to sell its shares. The Fund may invest in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods.

You should consider the Fund's investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund's summary prospectus and prospectus, which can be obtained by calling 1-800-796-5606 or visiting our website at www.hwcm.com. Read carefully before you invest.

Returns shown for A and C Shares for the periods prior to their inception are derived from the historical performance of I Shares of the Fund during such periods and have been adjusted to reflect the higher total annual operating expenses of each specific Share class (Inception date: I Shares-9/20/85, A Shares-10/6/00, C Shares-2/4/02). Returns shown for A Shares and C Shares without sales charge do not reflect the maximum sales load of 5.25% or the Contingent Deferred Sales Charge (CDSC) of 1.00% for the first year; if reflected, performance would be lower than shown. Returns for A and C shares reflect the deduction of the current maximum initial sales charges of 5.25% and 1.00% CDSC. C Shares convert automatically to A Shares approximately eight years after purchase. A Shares are subject to lower annual expenses than C Shares. Class I shares sold to a limited group of investors. Periods over one year are average annual total return. Average annual total returns include reinvestment of dividends and capital gains. Expense limitations may have increased the Fund's total return.

The **Russell 2000® Index** measures the performance of the 2,000 smallest companies in the Russell 3000® Index. The **Russell 2000® Value Index** measures the performance of those Russell 2000® companies with lower price-to-book ratios and lower forecasted growth values. The indices do not reflect the payment of transaction costs, fees and expenses associated with an investment in the Fund. The Fund's value disciplines may prevent or restrict investment in major stocks in the benchmark indices. It is not possible to invest directly in an index. The Fund's returns may not correlate with the returns of their benchmark indices. ETFs stands for Exchange-traded Funds. Book value is the net asset value of a company, calculated by subtracting total liabilities from total assets. Dividend payout ratio is the percentage of earnings paid to shareholders in dividends. Earnings growth is the annual rate of growth of earnings from investments. Top ten holdings as of 3/31/17 as a % of the Fund's net assets: ARRIS International PLC 4.4%, EnPro Industries Inc. 4.3%, Enstar Group Ltd. 4.0%, Horace Mann Educators 3.7%, WestJet Airlines 3.6%, Office Depot Inc. 3.6%, KBR Inc. 3.3%, Popular Inc. 3.2%, TRI Pointe Group Inc. 3.1%, and Seritage Growth Properties 3.1%. Fund holdings are subject to change and are not recommendations to buy or sell any security.

Investing in value stocks presents the risk that value stocks may fall out of favor with investors and underperform other asset types during a given periods. Equities, bonds, and other asset classes have different risk profiles, which should be considered when investing. All investments contain risk and may lose value. Specific securities identified are the largest contributors (or detractors) on a relative basis to the Russell 2000 Value Index. Securities' absolute performance may reflect different results. The Fund may not continue to hold the securities mentioned and the Advisor has no obligation to disclose purchases or sales of these securities. Attribution is an analysis of the portfolio's return relative to a selected benchmark, is calculated using daily holding information and does not reflect the payment of transaction costs, fees and expenses of the Fund.
