

Manager Review and Economic Outlook

Market Commentary

The Russell 2000 Index returned +5.7% in the third quarter; the Russell 2000 Growth and Value Indexes returned +6.2% and +5.1%, respectively. The S&P 500 Index returned +4.5%, its 8th consecutive positive quarter. Dating back to 2013, this index has generated a positive return in 18 of the last 19 calendar quarters—a feat it had not previously accomplished in its 90+ year history. Part of the reason for this impressive run was the market's valuation at the outset of the period. At the beginning of 2013, for example, the Russell 2000 Value Index traded at 1.3x book value; the financial crisis' mess had been largely cleaned up but valuations remained in check. Since then, corporate earnings have been strong and the economic environment supportive. Accordingly, we categorize most of the performance over this period as a reversion toward normal market valuations as opposed to a market that has overheated dramatically. Based on most valuation measures, the reversion appears to have overshot historical averages but not wildly so—we are not alarmed, we are guarded.

Thus far in 2017, small cap growth stocks have outperformed small cap value stocks by more than 11 percentage points. Much of this performance difference is attributable to the growth index's large overweight in healthcare and technology and underweight in financials and energy.

The more expensive sectors outperformed the less expensive sectors this year which has led to a wide valuation discrepancy between the value and growth indexes. We have continued to find value opportunities selectively, though it is more difficult today than it was 5 years ago. Industrials and financials represent the portfolio's largest weights; we have no/limited exposure in telecom, consumer staples, and utilities. The former sectors not only trade at considerable valuation discounts but also have higher earnings growth expectations over the next two years compared to the latter sectors. We are always leery of paying high multiples for stocks, particularly when growth prospects are minimal.

While select market segments appear richly valued, we believe others remain quite attractive. Given this dichotomy, our portfolio's composition and its characteristics are vastly different from the index. The valuation discount is particularly striking; the portfolio trades at 8x normal earnings compared to 16x for the Russell 2000 Value.

The Hotchkis & Wiley Small Cap Value Fund (Class I) outperformed the Russell 2000 Value Index in the third quarter. Positive stock selection in technology, industrials, and real estate helped relative performance. The overweight in industrials was also a positive contributor.

Stock selection in healthcare, materials, and financials detracted from performance in the quarter. The largest individual contributors to relative performance were WestJet Airlines, Embraer, Rush Enterprises, Meritor, and KBR; the largest detractors were Popular, Energy XXI Gulf Coast, Office Depot, LSC Communications, and Real Industry.

Mutual fund investing involves risk. Principal loss is possible. Investing in smaller and/or newer companies involves greater risks than those associated with investing in larger companies, such as business risk, significant stock price fluctuations and illiquidity. The Fund may invest in ETFs, which are subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of an ETF's shares may trade at a discount to its net asset value ("NAV"), an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a Fund's ability to sell its shares. The Fund may invest in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods.

The Fund's total annual operating expense ratio as of the most current prospectus is 1.04% for I Shares, 1.29% for A Shares and 2.04% for C Shares. Expense ratios shown are gross of any fee waivers or expense reimbursements.

The performance shown represents past performance. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. Investment results and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. To obtain performance data current to the most recent month-end, access our website at www.hwcm.com.

You should consider the Fund's investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund's summary prospectus and prospectus, which can be obtained by calling 1-800-796-5606 or visiting our website at www.hwcm.com. Read carefully before you invest.

Returns shown for A and C Shares for the periods prior to their inception are derived from the historical performance of I Shares of the Fund during such periods and have been adjusted to reflect the higher total annual operating expenses of each specific Share class (Inception date: I Shares-9/20/85, A Shares-10/6/00, C Shares-2/4/02). Returns shown for A Shares and C Shares without sales charge do not reflect the maximum sales load of 5.25% or the Contingent Deferred Sales Charge (CDSC) of 1.00% for the first year; if reflected, performance would be lower than shown. Returns for A and C shares reflect the deduction of the current maximum initial sales charges of 5.25% and 1.00% CDSC. C Shares convert automatically to A Shares approximately eight years after purchase. A Shares are subject to lower annual expenses than C Shares. Class I shares sold to a limited group of investors. Periods over one year are average annual total return. Average annual total returns include reinvestment of dividends and capital gains. Expense limitations may have increased the Fund's total return.

The Russell 2000® Index measures the performance of the 2,000 smallest companies in the Russell 3000® Index. The Russell 2000® Value Index measures the performance of those Russell 2000® companies with lower price-to-book ratios and lower forecasted growth values. The Russell 2000® Growth Index measures the performance of those Russell 2000® Index companies higher price-to-book ratios and higher forecasted growth values. The S&P 500® Index is a broad based unmanaged index of 500 stocks, which is widely recognized as representative of the equity market in general. The indices do not reflect the payment of transaction costs, fees and expenses associated with an investment in the Fund. The Fund's value disciplines may prevent or restrict investment in major stocks in the benchmark indices. It is not possible to invest directly in an index. The Fund's returns may not correlate with the returns of their benchmark indices. Book value is the net asset value of a company, calculated by subtracting total liabilities from total assets. Earnings growth is the annual rate of growth of earnings from investments. Top ten holdings as of 9/30/17 as a % of the Fund's net assets: Enstar Group Ltd. 4.7%, Seritage Growth Properties 4.7%, WestJet Airlines 4.3%, Masonite Int'l Corp. 4.2%, ARRIS International PLC 4.0%, KBR Inc. 3.4%, Horace Mann Educators 3.3%, TRI Pointe Group Inc. 3.2%, Popular Inc. 2.9%, and Matson Inc. 2.8%. Fund holdings are subject to change and are not recommendations to buy or sell any security.

¹% of total portfolio includes total investments, cash and cash equivalents, and accrued investment income on a trade date basis.

Investing in value stocks presents the risk that value stocks may fall out of favor with investors and underperform other asset types during a given periods. Equities, bonds, and other asset classes have different risk profiles, which should be considered when investing. All investments contain risk and may lose value. Specific securities identified are the largest contributors (or detractors) on a relative basis to the Russell 2000 Value Index. Securities' absolute performance may reflect different results. The Fund may not continue to hold the securities mentioned and the Advisor has no obligation to disclose purchases or sales of these securities. Attribution is an analysis of the portfolio's return relative to a selected benchmark, is calculated using daily holding information and does not reflect the payment of transaction costs, fees and expenses of the Fund.
