You should consider the Hotchkis & Wiley High Yield Fund's investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund's summary prospectus and prospectus, which can be obtained by calling 1-800-796-5606 or visiting our website at www.hwcm.com. Read carefully before you invest.

Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investment by the Fund in lower-rated and non-rated securities presents a greater risk of loss to principal and interest than higher-rated securities. The Fund may invest in derivative securities, which derive their performance from the performance of an underlying asset, index, interest rate or currency exchange rate. Derivatives can be volatile and involve various types and degrees of risks. Depending on the characteristics of the particular derivative, it could become illiquid. Investment in Asset Backed and Mortgage Backed Securities include additional risks that investors should be aware of such as credit risk, prepayment risk, possible illiquidity and default, as well as increased susceptibility to adverse economic developments. The Fund may invest in foreign as well as emerging markets which involve greater volatility and political, economic and currency risks and differences in accounting methods. High yield bonds and other asset classes have different risk return profiles, which should be considered when investing. All investments contain risk and may lose value.
